

Sentinel Protection Installer Version 7.6.1 – Release Notes

This document contains information on new features, supported/unsupported platforms, and known issues in Sentinel™ Protection Installer version 7.6.1 release.

Product Overview

Sentinel Protection Installer is an integrated installer of the Sentinel System Driver, Sentinel Security Runtime, Sentinel Protection Server, and Sentinel Keys Server.

Sentinel Protection Installer 7.6.1 supports following versions of its components:

Component	Version Supported
Sentinel System Driver	7.5.1
Sentinel Security Runtime	1.0.1
Sentinel Protection Server	7.6.0
Sentinel Keys Server	1.3.0

Platforms Supported

This installer can be run on Microsoft Windows 98/ME/2000, XP(32-bit and 64-bit), Server 2003(32-bit and 64-bit), Vista(32-bit and 64-bit), Server 2008(32-bit and 64-bit), Server 2008 R2 (64-bit), and Windows 7 (32-bit and 64-bit).

Note: For information on the platforms supported by Sentinel Protection Installer components, refer to the *Sentinel Protection Installer ReadMe*.

What's New in This Release?

This section provides information about the new features provided in this release.

Support for Windows Server 2008 R2 and Windows 7

Sentinel Protection Installer can now be used for installing Sentinel System Driver, Sentinel Security Runtime, Sentinel Protection Server, and Sentinel Keys Server on Windows Server 2008 R2 (64-bit) and Windows 7 (32-bit and 64-bit).

WHQL Certification for Windows Server 2008, Windows Server 2008 R2, and Windows 7

The Sentinel System Driver for USB keys is now Windows Hardware Quality Lab (WHQL) certified for Windows Server 2008 (32-bit and 64-bit), Windows Server 2008 R2 (64-bit), and Windows 7 (32-bit and 64-bit) also; in addition to Windows 2000, XP (32-bit and 64-bit), Server 2003 (32-bit and 64-bit), and Vista (32-bit and 64-bit). This allows Windows Logo compliance for applications that use Sentinel Keys.

Windows 7 Software Logo Compliance

Sentinel Protection Installer complies with Windows 7 software logo requirements. This enables you to apply for Windows 7 logo for your applications that are using any SPI component.

Known Issues

- Standard users cannot uninstall Sentinel Protection Installer from the Control Panel using the **Uninstall** option on Windows Server 2008, Windows Server 2008 R2, Windows Vista, and Windows 7 systems. It is recommended that the standard users should select **Change** and subsequently select **Remove** from **Program Maintenance** dialog of Sentinel Protection Installer to perform uninstallation on Windows Server 2008, Windows Server 2008 R2, Windows Vista, and Windows 7 systems.
- On Windows Server 2008 R2 and Windows 7, the **Program Compatibility Assistant** dialog box may appear when you exit the driver configuration program (*SetupSysDriver.exe*). Click **This program installed correctly** to prevent the dialog box from appearing in the future.

If you are linking the driver configuration program to your own installer, we recommend renaming the application and the manifest file to prevent the **Program Compatibility Assistant** dialog box from appearing. For example, you can rename the application and the manifest file to *CfgSysDriver.exe* and *CfgSysDriver.exe.manifest*.

Removed Platform Support

The Sentinel Protection Installer no longer supports Sentinel Protection Server on the following platforms:

- Windows 98
- Windows ME

Note: Sentinel Protection Installer 7.5.0 is the last release that supports Sentinel Protection Server on Windows 98 and Windows ME.
